

Charlie Chen

(484) 686-1251 | charliechen@college.harvard.edu | <https://cchenalds17.github.io> | U.S. Citizen

EDUCATION

Harvard University

Cambridge, MA

Bachelor of Science in Electrical Engineering, Minor in Computer Science | GPA: 3.96/4.0

May 2027

- Relevant Courses: Circuits Devices & Transduction, Systems & Control, Computing Hardware, Physics E&M, Systems Programming, Intro to Machine Learning (MIT), Intro to Distributed Computing, Data Structures & Algorithms

Friends Select School

Philadelphia, PA

High School Diploma | GPA: 4.31/4.0, Phi Beta Kappa | Student President, Robotics Club Founder

June 2023

TECHNICAL SKILLS

Software: Python, C, C++, Arduino, MATLAB, SystemVerilog, Linux, Git, OpenCV, PyTorch

Hardware: Soldering, Op Amps, Function Generator, Oscilloscope, Power Supply, Multimeter

ENGINEERING PROJECTS

VLA Robot Arm | Python, Arduino, Computer Vision

June – July 2025

- Wrote camera handler to undistort, crop, & stream Meta Aria glasses video into SmolVLA recording/inference pipeline
- Developed Arduino firmware to drive arm servo (with stabilizing capacitor) over lightweight custom serial protocol
- Created teleoperation recorder to log camera frames, servo angles, & tasks to curate dataset for model fine-tuning
- Implemented autonomous action inference loop that parses inputs & issues live servo commands to complete task

Reverb Karaoke Machine | Filters, Op Amps, DAC, Digital Signal Processing, Soldering

April 2025

- Built passive high-pass & low-pass filter stages with op-amp buffers to condition microphone signals for Arduino ADC
- Coded Arduino signal processing firmware at 8 kHz sample rate, featuring dynamic compression and reverb effects
- Engineered 10-bit R-2R DAC with low-pass output filters to reconstruct & smooth processed audio for speaker playback

Client-Server Chat App | Sockets, Custom Protocol, JSON, gRPC, SQL, Python

March 2025

- **Created** chat app with real-time message delivery with offline queuing, secure account creation, and authentication
- Designed & implemented JSON-based and custom wire protocol (10+ times throughput increase) using sockets
- Re-architected the system with gRPC, evaluating impacts on client/server structure, testing, and overall performance

Mask Detector | PyTorch, OpenCV, Arduino, Embedded Software

Sept. 2021 – Dec. 2022

- Built face detection pipeline with optimized MobileNetV2 (91% accuracy) to spray unmasked people with water
- Wrote Arduino firmware for serial-controlled relay actuation and prototyped/soldered the relay & motor circuit

EXPERIENCE

Harvard Ability Lab | Cambridge, MA

June 2025 – Present

Undergraduate Researcher (PI: Patrick Slade)

- Analyzing vision-language-action model performance on egocentric robotic arms in human-robot interaction tasks
- Engineered human-mounted rig for supernumerary robotic arm by designing custom CAD chest plate & harness
- Teleoperated arm to build high-fidelity 10K+ frame dataset for VLA fine-tuning & quantified movement using OpenCap
- Designed protocol with varying interaction complexity, human movement, etc. on ADL tasks to benchmark performance

ADDITIONAL SKILLS & INTERESTS

Fluent Languages: English, Mandarin

Interests: Hiking, Cooking, Running, Speedcubing
